High Pressure Line - Compiled Pressure and Power

- Pressure control reduced from 1100 PSI to 1050 PSI
- Pressure control reduced from 1050 PSI to 1000 PSI
- Memorial day shutdown produces lower valley; short drop to zero caused by pump turnoff while branch-valve testing was completed

*Note: Black pressure trendline is a rolling 100 point average, and is thus slightly out of phase with data; it is included solely for visual clarity and was not used for calculations.*
